## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

***Detail Action***

1. This Office Action is in response to the Application SN 09/839,467 filed on 04/20/2001. Claims 1-11 are presented for examination.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Anthony (US 2002/0161621 A1).**

4. As to claim 1, Anthony teaches a system and method for remotely qualifying a prospective customer's data stream transformation project, comprising:

an Internet host for storing a targeted procedures model (*a qualifier database 190 currently resides on the Internet host 180*) (Anthony, Fig. 1 and paragraph [0018]);

a user site having a phone and a user computer equipped with an e-mail client, Web browser and a modem (Anthony, Fig. 1 and paragraph [0018]);

a prospect site having a prospect phone and a prospect computer operating on one or more prospect applications and monitoring software, and equipped with a prospect terminal, a data storage device, a prospect e-mail client, prospect Web browser and prospect modem for communicating with the user site and Internet host (Anthony, Fig. 1 and paragraph [0018]);

wherein the monitoring software records data streams flowing between prospect terminal emulation software being operated by a prospect (*i.e., by a "remote qualifier"*) at the prospect site and the one or more prospect applications, and stores the recorded data streams on the data storage device (*prospect uses prospect Web browser 175 to access historical information, i.e., to access recorded data streams, on qualifier database 190*) for retrieval and incorporation into the targeted procedures model (Anthony, Figs. 2-3 and paragraph [0018-0019 and 0021]).

5. As to claim 2, Anthony teaches the system of claim 1, wherein the monitoring software further communicates the recorded data streams to the user computer for displaying captured prospect terminal screens (*prospect uses prospect Web browser 175 to access historical information, i.e., to access recorded data streams, on qualifier database 190*) (Anthony, paragraph [0019]).

Art Unit: 2141

6. As to claims 3-4, Anthony teaches the system of claim 2, wherein the monitoring software accepts and inserts data from a user at the user site into the recorded data streams, comprising synchronization points (*the transformation will be porting data from one operating system to another, or from a wired application to a wired/wireless client device*) (Anthony, paragraph [0031 - 0035]).

7. As to claim 5, Anthony teaches the system of claim 1, wherein the prospect may view the targeted procedures model using the prospect Web browser (*the remote qualifier directs the prospect to the vendor's Web site to search for previous data stream transformations using the prospect Web browser 175 to access qualifier database 190 via Internet 140*) (Anthony, paragraph [0039]).

8. Claims 6-11 are corresponding method claims of system claims 1-5; therefore, they are rejected under the same rationale.

9. Further references of interest are cited on Form PTO-892, which is an attachment to this office action.
